Welcome to the RISC-V Technical wiki home page!!!

This page serves as the main anchor point for the most important pieces of technical information for RISC-V. If you're looking for something technical, start here.

Are you new to RISC-V and want to understand how things work? Start here:

1. **Getting Started Guide**
   - Read this first to get an overview of the technical workings of RISC-V | [English](#), [Chinese](#)

2. **Lifecycle Guide**
   - Follow this step-by-step guide for the key processes to form groups, ratify specifications, and perform software development | [English](#), [Chinese](#)

3. **Technical Org Chart**
   - View this interactive presentation to navigate the technical groups and find contacts and mailing lists. | [English](#)

4. **RISC-V Technical Calendar**
   - View the calendar in your time zones | [Link](#)
   - To view other calendars, see the Viewing the RISC-V Technical Calendar wiki page.

5. **Specification Status**
   - Bookmark this "dashboard" of active specifications under development | [English](#)

6. **Technical Policies**
   - Review Approved Policies in Google Drive | [Link](#)
   - Find Policies in other states either through a wiki page or Google Drive (direct link)

7. **Technical Newsletter**
   - Overview | [Submit New Entry Now](#) | [Review Submitted Entries](#)

If you're experienced or looking for more detailed information, please see these pages:

- RISC-V Technical Specifications
- Recently Ratified Extensions
- Specification State Definitions
- Additional RISC-V Documentation
- RISC-V Technical Sessions
- RISC-V Software Ecosystem
- RISC-V Hardware Ecosystem
- RISC-V Group Mailing Lists
- GitHub Repo Map
- Google Drive
- Important Links (titled "Technical Overview" due to its legacy role)

If you cannot find something or have a technical question, please reach out to help@riscv.org.
