Specification States

Discussion Document
Assume everything can change. This document is not complete yet and was created only for the purpose of conversation outside of the document.

Development
Assume everything can change.

Stable
Assume anything could still change, but limited change should be expected.

Frozen
Change is extremely unlikely. A high threshold will be used, and a change will only occur because of some truly critical issue being identified during the public review cycle. Any other desired or needed changes can be the subject of a follow-on new extension.

Ratified
No changes are allowed. Any desired or needed changes can be the subject of a follow-on new extension. Ratified extensions are never revised.
